ICONICS GENESIS Chosen as GUI for Underwater Tooling Modules

ICONICS GENESIS32 has been chosen as the Graphical User Interface (GUI) in a new range of underwater tooling modules for underwater hydraulic specialists, Specialist ROV Tooling Services Ltd, based in Inch, Aberdeen.

The tooling modules consist of some of the most compact intelligent hydraulic valve packs currently available today. Included in the range are an 8 function servo/proportional valve pack and a tooling valve pack containing eight bidirectional solenoid valves, a pressure controller, a pressure sensor, water alarm, oil compensator alarm and an external connection for specialist tools such as a torque tool for opening and closing manually controlled valves using a robot instead of a diver. The torque has to be accurately controlled to prevent the tool from damaging the valves.

Inside the valve packs are specially designed circuit boards rated for 5000m (500Bar) pressure with electronics for all of the above as well as four analogue inputs for additional sensors such as the torque sensor, a fast timer counter used to

count pulses for a turns counter (>20khz) and two analogue outputs for additional servo valves for controlling flow etc. These systems are designed for some of the toughest environments in the world.

ICONICS UK Launches Blog and Joins Twitter

ICONICS UK has launched a blog, designed to give you the latest industry news, with the opportunity to comment and keep in touch with us. The blog will feature ICONICS news as well technical tips and tricks. To see the blog and leave your comments please visit blog.iconics-uk.com

Customers and partners can now also check in on the latest happenings from ICONICS UK through popular social messaging utility, Twitter. Keep up to date with ICONICS announcements including information on webcasts, seminars and videos. To follow us please visit www.twitter.com/ICONICS_UK

ICONICS UK Certified ISO 9001:2008 Compliant

ICONICS UK has been certified ISO 9001:2008 compliant by BSI, based on a commitment to high standards and continual improvement. This certification includes the changes made to ISO 9001, of which ICONICS UK received 9 prior certifications.

ISO 9001:2008 is the worlds most established quality framework and requires certified companies to monitor processes and keep adequate records. This standard ensures that ICONICS UK customers will continue to benefit from dependable and reliable service and products.

Licensing Supplier Change

After consulting with our client base, ICONICS has taken the decision to change the vendor for supply of both our soft and hardware licensing. Our previous supplier options around USB support were limited, therefore ICONICS has taken the decision to reevaluate their offering with a view to the improvement of reliability.

Sign Up Now for ICONICS Popular Training Sessions

Now is the perfect time to consider ICONICS' industrial automation software training at our West Midlands Training Facility. You'll have direct access to new, state-of-the-art ICONICS technologies, demonstrated by our knowledgeable staff. Choose from beginner to advanced level courses for GENESIS32™ HMI/SCADA, BizViz™ Manufacturing Intelligence or contact us for information on GENESIS64™, Productivity Analytics or OPC Tools training courses.

Our current training schedule is as follows;

15 – 17 September	Standard GENESIS32
18 September	MMX/ WebHMI
27 – 28 October	Standard BizViz
27 October	ReportWorX
28 October	BridgeWorX
1 – 3 December	Standard GENESIS32
4 December	MMX/ WebHMI

Please contact Asad Siddiqui on +44 (0)1384 275 500 or email asad.siddiqui@iconics-uk.com to book your place on one of these training courses, or if you would like information on the advanced, GENESIS64, Productivity Analytics, OPC Tools or Custom training courses.
