Cully Automation Delivers Telemetry Project

Cully Automation, leading integrators in the Irish Water and Wastewater industry, supply countywide telemetry project for an Irish Local Authority using ICONICS solutions, GENESIS32, AlarmWorX, AlarmWorX Multimedia and WebHMI.

This project uses six WebHMI servers, one in each regional office, to gather information from a network of PLC and low power radio nodes. The Local Authority will use this information to view the flow of water countywide, monitor and alarm of high flows, reservoir levels, water quality issues and will eventually control pumps and motorised valves throughout the county.

The Local Authority will benefit from thin client connectivity using WebHMI, and will be able to view all their graphical information displays, trends and alarms through a web browser. The addition of AlarmWorX Multimedia to this solution ensures that any triggered alarms can be distributed to the right people via a number of communication methods including phone and email.

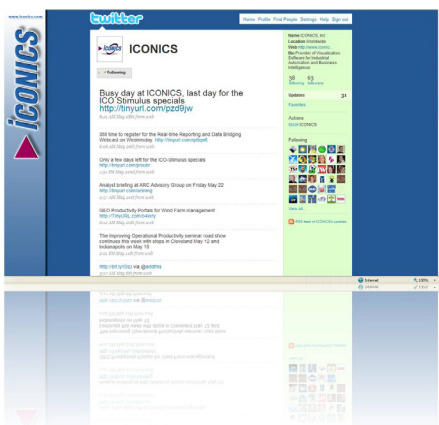

Cully Automation chose to recommend GENESIS32 for this project based on their excellent and longstanding relationship with ICONICS UK and because they knew that the solution could handle the complex needs and requirements of their client.

ICONICS Introduces New Web Licensing Utility

Customers visiting ICONICS Web Licensing Utility will have the option of selecting either 'Software' or 'Hardware' license key types for their applicable ICONICS automation software solutions. Part of ICONICS SupportWorX program, the on-line utility also allows users to view their existing licenses, look through the licensing Info Center (for both software and hardware license key types), request key replacements, view frequently asked questions and receive general help.

Sign Up Now for ICONICS Popular Training Sessions

Now is the perfect time to consider ICONICS' industrial automation software training at our West Midlands Training Facility. You'll have direct access to new, state-of-the-art ICONICS technologies, demonstrated by our knowledgeable staff. Choose from beginner to advanced level courses for GENESIS32™ HMI/SCADA, BizViz™ Manufacturing Intelligence or contact us for information on GENESIS64™, Productivity Analytics or OPC Tools training courses.

Our current training schedule is as follows;

4 – 5 August	Standard BizViz
4 August	ReportWorX
5 August	BridgeWorX
15 – 17 September	Standard GENESIS32
18 September	MMX/ WebHMI
27 – 28 October	Standard BizViz
27 October	ReportWorX
28 October	BridgeWorX
1 – 3 December	Standard GENESIS32
4 December	MMX/ WebHMI

Please contact Asad Siddiqui on +44 (0)1384 275 500 or email asad.siddiqui@iconics-uk.com to book your place on one of these training courses, or if you would like information on the advanced, GENESIS64, Productivity Analytics, OPC Tools or Custom training courses.
